

Test Case ID	Test Case Description	Pre-condition	Test Steps	Test Data (Input)	Expected Result	Actual Result	Status
TC_001	Confirm that the URL is visible for the Browser	User has access to app URL	1. Launch the web browser 2. Enter URL	1. Microsoft Edge 2. https://opensource-demo.orangehrmlive.com/	The application URL should open successfully in the selected browser.	The application URL opened successfully in the browser.	Pass
TC_002	Verify that the login page opens successfully from the application URL	User has access to URL	1. Open the web Browser 2. Enter URL 3. LoginPage	1. Chrome 2. https://opensource-demo.orangehrmlive.com/ 3. Accessible	The login page should load without errors and be ready for user interaction.	The login page loaded successfully and was accessible.	Pass
TC_003	Validate authentication using invalid email and valid password	User is on login Page	1. Enter invalid Email 2. Enter valid Password 3. Click login	1. Email- Admin@ty 2. Password- admin123 3. Click login	The system should reject the login attempt and display an appropriate validation message.	The login attempt was blocked and an error message was displayed.	Pass
TC_004	Validate authentication using Username in uppercase (if case sensitive)	User is on login Page	1. Enter Valid Username 2. Enter Valid Password 3. Click Login	1. Valid Username- ADMIN 2. Valid Password- admin123 3. Click Login	Login should be successful regardless of the letter casing used in the username.	Authentication completed successfully.	Pass
TC_005	Validate authentication using copy pasted valid credentials	User is on login Page	1. Enter Valid Username 2. Enter Valid Password 3. Click Login	1. Valid Username- admin 2. Valid Password- admin123 3. Click Login	User should login successfully, copy-paste should not interfere with login functionality.	User successfully logged in.	Pass
TC_006	Validate authentication using credentials saved in browser	User has previously logged in successfully and saved credentials in the browser.	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- admin 2. Valid Password- admin123 3. Click Login	User should login successfully with auto-filled credentials from browser.	User successfully logged in.	Pass
TC_007	To Verify successful logout	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login 4. Click on Admin Panel 5. Logout	1. Valid Username- admin 2. Valid Password- admin123	User should successfully logout.	User successfully logged out.	Pass
TC_008	To Verify correct redirection (login, navigate to dashboards)	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- admin 2. Valid Password- admin123 3. Click Login	User should correctly login and navigate to dashboard.	User successfully logged in and correctly navigated to dashboard.	Pass
TC_009	Validate authentication using invalid username and valid password	User is on login Page	1. Username 2. Password 3. Click Login	1. Invalid Username- messi 2. Valid Password- admin123 3. Click Login	User should not be able to login and error message should be shown.	User is not able to login and shows error message.	Pass
TC_010	Validate authentication using valid username and invalid password	User is on login Page	1. Username 2. Password 3. Click Login	1. Valid Username- cr7 2. Invalid Password- messi10 3. Click Login	User should not be able to login by valid username and invalid password.	User is not able to login and shows error message.	Pass
TC_011	To verify login by leaving username blank and entering password	User is on login Page	1. Username 2. Password 3. Click Login	1. Blank Username 2. Valid Password- admin123 3. Click Login	User should not be able to login by blank username and valid password.	User is not able to login and shows error message.	Pass
TC_012	To verify login by valid username and blank password	User is on login Page	1. Username 2. Password 3. Click Login	1. Valid Username- Admin 2. Blank Password 3. Click Login	User should not be able to login by valid username and blank password.	User is not able to login and shows error message.	Pass
TC_013	Validate authentication using invalid username and valid password	User is on login Page	1. Username 2. Password 3. Click Login	1. Invalid Username- hazard 2. Password- admin123 3. Click login	User should not be able to login by invalid username and valid password.	User is not able to login and shows error message.	Pass
TC_014	Validate authentication using invalid username and invalid password	User is on login Page	1. Username 2. Password 3. Click Login	1. Invalid Username- jose 2. Invalid Password- joseucl 3. Click login	User should not be able to login by invalid username and invalid password.	User is not able to login and shows error message.	Pass
TC_015	To verify login by using username with special character	User is on login Page	1. Username 2. Password 3. Click Login	1. Username- messi@% 2. Password- admin123 3. Click Login	User should not be able to login by using username with special character.	User is not able to login and shows error message.	Pass
TC_016	To verify login by using password filled with spaces	User is on login Page	1. Username 2. Password 3. Click Login	1. Username- Admin 2. Password- admin 123 3. Click Login	User should not be able to login by using password with spaces.	User is not able to login and shows error message.	Pass
TC_017	To verify login by using password filled with emojis	User is on login Page	1. Username 2. Password 3. Click Login	1. Username- Admin 2. Password- admin123(emoji) 3. Click Login	User should not be able to login by using password with emojis.	User is not able to login and shows error message.	Pass
TC_018	To verify login by using password shorter than minimum length requirement	User is on login Page	1. Username 2. Password 3. Click Login	1. Username- Admin 2. Password- adm 3. Click Login	User should not be able to login by using password shorter than minimum length requirement.	User is not able to login and shows error message.	Pass
TC_019	To verify Logo is visible and clear on the login page	User is on login Page	1. Observe Logo	-	OrangeHRM Logo should appear in correct size, without distortion.	OrangeHRM Logo appears in correct size, without distortion.	Pass
TC_020	To verify Product Name display correctly	User is on login Page	-	-	OrangeHRM text should be visible and correctly spelled.	OrangeHRM text is visible and correctly spelled.	Pass
TC_021	To Check the Username, password and other fields are properly aligned	User is on login Page	1. Username 2. Password 3. Observe alignment	1. Username- Admin 2. Password- admin123	Username, Password and other fields should be properly aligned.	Username, Password and other fields are properly aligned.	Pass
TC_022	To check whether login button is disabled until both fields are filled	User is on login Page	1. Username 2. Password 3. Observe Login button	1. Username- Admin 2. Password- admin123	Login button should be disabled until both fields are filled.	Login button is not disabled.	Fail
TC_023	To verify Forgot Your Password is clickable and redirects to password recovery page	User is on login Page	1. Click Forgot your password	1. Click Forgot your password	After clicking Forgot your password user should be redirected to password recovery page.	User is redirected to password recovery page.	Pass
TC_024	To verify clear error message for invalid credentials	User is on login Page	1. Username 2. Password 3. Login Button	1. Valid Username- Admin 2. Invalid Password- emilokan 3. Login Button	Invalid Credentials should be shown in red text above field.	Invalid Credentials shown in the red text above field.	Pass
TC_025	To verify mobile usability	User is on login Page	-	-	Login page should fit properly on mobile screen without zoom.	Login page fits properly on mobile screen without zoom.	Pass
TC_026	To verify password reset process is easy to find	User is on login Page	1. Forgot Your Password	1. Click on Forgot Your Password	Forgot Your Password link should lead to reset password process.	Forgot Your Password link leads to reset password process.	Pass

Test Case ID	Test Case Description	Pre-condition	Test Steps	Test Data (Input)	Expected Result	Actual Result	Status
TC_027	To check password field hides/masked characters	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- Admin 2. Valid Password- admin123 3. Click Login	Password should be hidden/masked while entering.	Password is masked while entering.	Pass
TC_028	To check show/hide password icon is present or not	User is on login Page	1. Password	-	Show/hide password icon should be present on password field.	Show/hide password icon is not present on password field.	Fail
TC_029	To verify whether username/password field is case sensitive	User is on login Page	1. Valid Username (wrong case) 2. Valid Password (wrong case) 3. Click Login	1. Username- aDmiN 2. Password- MeSsi2026 3. Click Login	Login should fail if case does not match.	Login failed.	Pass
TC_030	To verify multiple wrong credentials locks account or not	User is on login Page	1. Incorrect username (5 times) 2. Incorrect Password (5 times) 3. Click login	1. Incorrect username- Amin 2. Incorrect Password- messicr7	Account should be locked after 5 attempts.	Account is not getting locked after 5 attempts.	Fail
TC_031	To verify dashboard URL cannot be directly accessed without login	User is on search bar	1. Login 2. Copy dashboard URL 3. Logout 4. Paste on new tab	1. Valid Username- Admin 2. Valid Password- admin123	User should be redirected to the login page if they try to access the dashboard without login.	User redirected to Login page.	Pass
TC_032	To verify pasted password cannot be copied or cut from the field	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- Admin 2. Valid Password- admin123 3. Click Login	User should be able to paste password but unable to copy or cut it.	User unable to copy or cut the pasted password.	Pass
TC_033	To verify Error message content	User is on login Page	1. Valid Username 2. Invalid Password 3. Click Login	1. Valid Username- Admin 2. Invalid Password- Messi2026 3. Click Login	User should get the error message Invalid credentials.	User gets the error message.	Pass
TC_034	Validate authentication using invalid credentials	User is on login Page	1. Valid Username 2. Invalid Password 3. Click Login	1. Valid Username- Admin 2. Invalid Password- vish123 3. Click Login	Error message Invalid Credentials should appear for invalid credentials.	Error Message appears Invalid Credentials.	Pass
TC_035	To verify Error message Invalid Credentials appears in red color	User is on login Page	1. Valid Username 2. Invalid Password 3. Click Login	1. Valid Username- Admin 2. Invalid Password- vish123 3. Click Login	Error message Invalid Credentials should appear in red color.	Error message Invalid Credentials appears in red color.	Pass
TC_036	To verify that error message disappears after successful login	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- Admin 2. Valid Password- admin123 3. Click Login	Error message should disappear after successful login.	Error message disappears after successful login.	Pass
TC_037	To verify that repeated login does not change error behaviour	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- Admin 2. Valid Password- admin123 3. Click Login	Repeated login should not change error behaviour.	Repeated login does not change error behaviour.	Pass
TC_038	To check error message for blank fields	User is on login Page	1. Blank Username 2. Blank Password 3. Click Login	1. Username- Blank 2. Password- Blank 3. Click Login	Error message Required should appear below input text field.	Error message Required appears below input text field.	Pass
TC_039	To verify no popups shown for error	User is on login Page	-	-	No popups should be shown for error.	No popups shown for error.	Pass
TC_040	To verify that error message does not reveal if username or password is wrong	User is on login Page	1. Invalid Username 2. Valid Password 3. Click Login	1. Invalid Username- hazard 2. Valid Password- admin123 3. Click Login	Error message should not reveal if Username or Password is incorrect.	Error message does not reveal if Username or Password is incorrect.	Pass
TC_041	To verify username field maximum input limit	User is on login Page	1. Username	1. Username- mesiiiiiiiiiii	Username field should accept maximum of 40 characters.	Username field is accepting more than 40 characters.	Fail
TC_042	To verify password field maximum input limit	User is on login Page	1. Password	1. Password- admin987654423456	Password field should accept maximum of 40 characters.	Password field is accepting more than 40 characters.	Fail
TC_043	To verify login by entering special symbols in username text field	User is on login Page	1. Username	1. Username- Admin@	Username should not allow login if special symbols are used.	Username does not allow login when special symbols used.	Pass
TC_044	To verify login by entering numbers only in username text field	User is on login Page	1. Username	1. Username- 9897326126812	Username should not allow login if numbers are used.	Username does not allow login when numbers used.	Pass
TC_045	To verify login by entering empty spaces in username text field	User is on login Page	1. Username	1. Username- a d m i n	Username should not allow login if spaces are used.	Username does not allow login when spaces used.	Pass
TC_046	Validate authentication using password only with special characters	User is on login Page	1. Password	1. Password- +_()&^%\$	System should allow login only if the special characters password matches stored password.	Password does not match.	Pass
TC_047	Validate authentication using password with minimum allowed characters	User is on login Page	1. Password	1. Password- admin97642341	Password field should accept minimum of 8 characters.	Password field accepts minimum 8 characters.	Pass
TC_048	To Verify Login on Chrome browser	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- Admin 2. Valid Password- admin123 3. Click Login	The system should authenticate the user and grant access to the application.	User logged in successfully.	Pass
TC_049	To Verify Login on Microsoft Edge	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- Admin 2. Valid Password- admin123 3. Click Login	The system should authenticate the user and grant access to the application.	User logged in successfully.	Pass
TC_050	To Verify Login on Safari	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- Admin 2. Valid Password- admin123 3. Click Login	The system should authenticate the user and grant access to the application.	User logged in successfully.	Pass
TC_051	To Verify Login on Firefox	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- Admin 2. Valid Password- admin123 3. Click Login	The system should authenticate the user and grant access to the application.	User logged in successfully.	Pass
TC_052	To Verify Login on Android browser	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- Admin 2. Valid Password- admin123 3. Click Login	The system should authenticate the user and grant access to the application.	User logged in successfully.	Pass
TC_053	To Verify Login on Private/Incognito mode	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- Admin 2. Valid Password- admin123 3. Click Login	The system should authenticate the user and grant access to the application.	User logged in successfully.	Pass
TC_054	Validate authentication using zoom set to 150%	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- Admin 2. Valid Password- admin123 3. Click Login	The system should authenticate the user and grant access to the application.	User logged in successfully.	Pass
TC_055	To verify login from 2 tabs at the same time	User is on login Page	Tab1 & Tab2: Enter credentials & Login	Tab1 & Tab2: Username- Admin, Password- admin123	Both sessions should remain logged in independently.	Both sessions remain logged in independently.	Pass
TC_056	To verify login from 2 different browsers simultaneously	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- Admin 2. Valid Password- admin123 3. Click Login	User should successfully log in from both browsers without affecting the first session.	User successfully logged in from both browsers.	Pass

Test Case ID	Test Case Description	Pre-condition	Test Steps	Test Data (Input)	Expected Result	Actual Result	Status
TC_057	To verify that after logout session cookie is cleared	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- Admin 2. Valid Password- admin123 3. Click Login	The session cookie should be cleared from browser immediately after logout.	The session cookie is cleared from browser after logout.	Pass
TC_058	To verify that session remains active on tab switch	User is on login Page	1. Login on Tab1 2. Open Tab2 3. Switch back to Tab1	Tab1 & Tab2: Username- Admin, Password- admin123	Session should remain active when switching tabs.	Session remains active when switching tabs.	Pass
TC_059	To verify login results with long delay	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login after 10-15 min	1. Valid Username- Admin 2. Valid Password- admin123	User should be logged in successfully even after the long delay.	User logged in successfully after the long delay.	Pass
TC_060	To check login after changing system time	User is on login Page	1. Valid Username 2. Valid Password 3. Change system time 4. Return to browser and login	1. Valid Username- Admin 2. Valid Password- admin123	Login should work normally if time changes do not affect authentication token.	Login works normally.	Pass
TC_061	To check login after network disconnected	User is on login Page	1. Disconnect internet 2. Enter credentials 3. Click Login 4. Reconnect and try again	1. Valid Username- Admin 2. Valid Password- admin123	Login should not authenticate when disconnected. After reconnecting login should work normally.	Login shows error when disconnected. Works normally after reconnecting.	Pass
TC_062	To verify login after clearing browser cache and cookies	User is on login Page	1. Clear cookies & cache 2. Navigate to OrangeHRM 3. Re-enter credentials	1. Valid Username- Admin 2. Valid Password- admin123	After clearing cookies, session should be invalidated. After re-login, app works normally.	Session invalidated. After re-login, app works normally.	Pass
TC_063	To verify login page loads within acceptable time	User is on login Page	1. Start stopwatch 2. Enter URL 3. Record load time	-	The OrangeHRM login page should fully load within <= 2 seconds on standard broadband.	The OrangeHRM login page loads within <= 2 seconds.	Pass
TC_064	To verify that login page still loads under slow network connection	User is on login Page	1. Simulate slow network 2. Enter URL 3. Record load time	1. Valid Username- Admin 2. Valid Password- admin123	Login page should load fully within <= 10-15 seconds under slow network.	Login page loads within <= 10-15 seconds on slow network.	Pass
TC_065	Confirm that there is no broken image on the page	User is on login Page	1. Observe page images	-	There should not be any broken image on the page.	There is no broken image on the page.	Pass
TC_066	Confirm that there are no spelling or grammar mistakes on the page	User is on login Page	-	-	There should not be any spelling or grammar mistakes on the page.	No spelling or grammar mistakes on the page.	Pass
TC_067	To verify that tab order is logical and sequential	User is on login Page	1. Press Tab key 2. Verify order 3. Press Shift+Tab for reverse	-	Focus should move in logical order: Username > Password > Login Button > Forgot Password.	Focus moved in logical and sequential order.	Pass
TC_068	To verify login during high server load	User is on login Page	1. Simulate high server load 2. Enter credentials 3. Click Login	1. Valid Username- Admin 2. Valid Password- admin123	Login should still succeed within an acceptable time.	Login succeeds in acceptable time.	Pass
TC_069	To verify password reset page has back to login option	User is on login Page	1. Click on Forgot Your Password	-	There should be a Back to login option available on password reset page.	Back to login option is available on password reset page.	Pass
TC_070	To verify that pressing Escape key does not cause navigation	User is on login Page	1. Focus on Username or Password 2. Press Escape key 3. Observe any change	-	Pressing Escape should not trigger page load, navigate away, or clear entered data.	Pressing Escape does not trigger page load or navigate away.	Pass
TC_071	To verify that OrangeHRM.Inc link is clickable	User is on login Page	1. Click OrangeHRM.inc link	-	OrangeHRM.inc link should be clickable and redirect to their platform page.	OrangeHRM.inc link is clickable and redirects correctly.	Pass
TC_072	To verify that fields are cleared after unsuccessful login	User is on login Page	1. Valid Username 2. Invalid Password 3. Click Login	1. Valid Username- Admin 2. Invalid Password- Vish123 3. Click Login	Login attempt should fail and show error. Fields should be cleared automatically.	Login attempt failed. Fields cleared automatically.	Pass
TC_073	To verify that screen is centered on screen in desktop view	User is on login Page	1. Open browser and maximize window 2. Navigate to OrangeHRM login page 3. Observe login screen position	-	The login page should be horizontally and vertically centered on the screen in desktop view.	The login page is horizontally and vertically centered.	Pass
TC_074	To verify that clicking logout redirects back to login page	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login 4. Click Profile 5. Click Logout	1. Valid Username- Admin 2. Valid Password- admin123	User should immediately be redirected to the OrangeHRM login page after logout.	User immediately redirected to the OrangeHRM login page after logout.	Pass
TC_075	Validate authentication using valid username and password	User is on login Page	1. Valid Username 2. Valid Password 3. Click Login	1. Valid Username- Admin 2. Valid Password- admin123 3. Click Login	The system should authenticate the user and grant access to the application.	The user was authenticated successfully and gained access to the application.	Pass
